# 22

### Pilot Assist driving functions

#### Advanced Pilot Assist

Intelligent cruise: ACC, HWA, ALCA

Lane keeping: LDW, LKA, ELKA, ELKA PLUS

#### Urban mobility

Congestion assist: TJA

Signal recognition: TSR, SLIF

Convenient parking: APA\*, PEB

#### smart security

Drive monitoring system: DMS

Evasive manoeuvre assist : EMA

Collision mitigation: FCM, AEB, RCM

Blind spot compensation: LCA, BSD, DOW,

FCTA, RCTA

### **HWA (Highway Assist)**

Keep a safe distance while encountering large vehicles

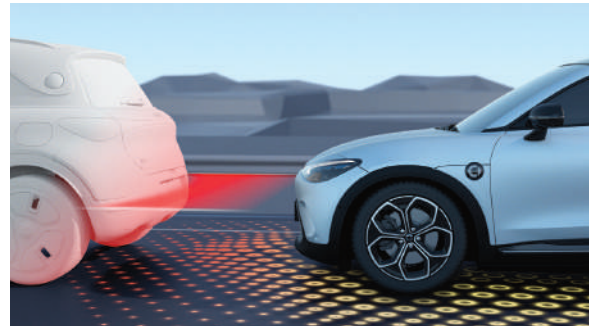

### **APA (Automatic Parking Assist)\***

Self-parking makes it a cinch to park

### **FCM (Front Collision Mitigation & Early Alert)**

Avoiding close contact with the vehicle in front

### **AEB (Autonomous Emergency Braking)**

Respond to emergencies with ease

## Beats® Soundsystem – 13 Speakers\*

Customized by Fresh Air Woofer,  
Up to 640 W power, studio grade sound effects

\*Options might be limited due to different models. More details please refer to the configuration.

\*Applicable in BRABUS variant only.

Low Poly Geometric line UI

New smart Companion "Cheetah"

## Body colors

Photon Orange\*

Quantum Blue

Digital White

Lumen Yellow

Future Green

Meta Black

Cyber Silver

## Rims style

**19" Flux**  
245/45 R19

\* Signature Photon Orange colour only available in the BRABUS variant.

\* The roof color and the body color are fixed combinations, the body color and the interior theme are fixed combinations.  
In case of any discrepancy please refer to manufacturer's original specifications.

## Interior themes

Infinite Black

Infinite Grey

### smart #3 Feature List

● Standard   ○ Optional   — Not equipped

Pro+	
Basic information	
Length/Width /Height (mm)	4400/1844/1556
Wheelbase (mm)	2785
Number of seats	5
E-motor peak power (kW)	200
E-motor peak power (hp)	272
Torque	343
0-100km/h acceleration time (s)*	5.8
WLTP range (km)*	435
NEDC range (km)	510
Driveline	RWD
Battery type	Lithium nickel manganese cobalt oxides battery (NCM)
Battery capacity (kWh)	66
Powertrain	BEV
Transmission	Single-speed automatic
Towing capacity (kg) - braked	1600
Kerb weight (kg)	1780
Total weight (kg)	2230
AC charge power (7.4kW)	●
AC charge power (22kW)	—
AC charging time** (7.4kW, 10-80%)	< 7.5 h
DC charge power (150kW)	●
DC super charging time** (150kW, 10-80%)	< 30 mins
Consumption WLTP Combined (kWh/100km)	16.3

Battery & eMotor	
Rear E-motor	Permanent magnet synchronous motor (PMSM)
Drive mode	ECO/Comfort/Sport

\* Time for 0-100km/h acceleration differs according to weather and road conditions, load capacity, driving habit and other factors.

\*\* Time for charging differs according to charger capacity.

\*\*\* smart Pilot Assist is only an auxiliary driving function and cannot take full control of the vehicle. The driver must take responsibility in observing the driving conditions and take over control when necessary. Caution should be observed in complicated traffic conditions, bad weather etc.

1. The roof and body color are a fixed combination and the styling color and interior theme are a fixed combination.(Please refer to product configuration on the website.)
2. Entry & high-level configurators differ in the ambient light coverage.
3. The high beam, a matrix consisting of 32 LED beads will automatically turn off while approaching another vehicle, to prevent glare to oncoming traffic. It can respond to 8 vehicles in front and 2 traffic signs at the same time.
4. Different versions correspond to different tire brands. Tire size specification are described in the configuration table.

smart cars will continue to upgrade and transform their products, and the equipment and parameters of automobile products may change accordingly. Smart Car will do everything possible to ensure the completeness and accuracy of the information; however, due to some objective reasons, such as the uncertainty of screen or paper materials, changing laws and regulations, and differences in personal understanding of relevant information, the products on the market might be slightly different from the above-mentioned information. Please refer to the final listed vehicles.

Due to different laws and regulations in various countries and regions, there may be configuration/name differences in some models.

Produced in August 2024, the content shown in this leaflet is for reference only.

The models shown in this leaflet are to local market specifications. Model configurations, pictures and other information may differ from the final produced model.

Please refer to the final delivered product or please contact your local sales and service outlet.

**BRABUS**

**#3** **BRABUS**

**Chase the thrill**

0-100km/h, 3.7s

Excellent performance for urban mobility

**3.7s**

**0-100km/h**

### **Dual-Motor intelligent 4 - Drive System**

With dual permanent magnet synchronous electric drive, the new smart #3 BRABUS has excellent performance in power.

With the intelligent 4 - drive system, the swift switching between rear drive and all-wheel drive can be achieved in only 0.4 seconds.

Feel the freedom of the urban drive and the open highway.

Unlock smart #3 BRABUS's impassioned, spirited driving experience anytime and anywhere.

**<35m**

0km/h braking distance

**315kW**

Total peak power

**543N·m**

Total peak torque

**16,500r/min**

Maximum motor speed

# Rocket Launch Mode

The new smart #3 BRABUS originally comes with the ejection mode, born with the fun of supercar driving.

The combination of brake and accelerator gives full play to the dual motor performance in a smart way!

**BRABUS**  
exclusive driving mode

A responsive torque burst of 543N.m cradles you in your seat: a testament to the genuine charm and power of #3 BRABUS supercar experience.

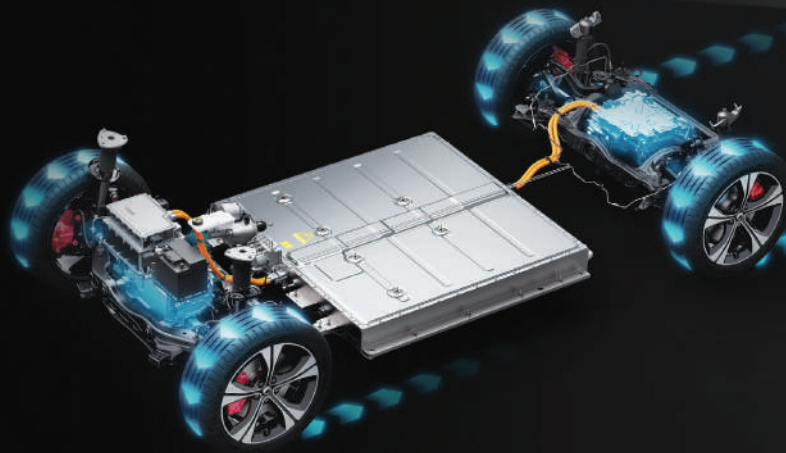

■ Driving with a low gravity center posture

## Sports chassis tuning

With the joint efforts from smart team and Mercedes-Benz team, after 3 stages and 5 rounds of adjustment, the new smart #3 BRABUS greatly improves the extreme stability at high-speed cornering.

Front to rear weight distribution greatly diminishes understeer or oversteer while cornering. Twists and turns are steady, smooth, and stable.

\*This result is better than the ISO 3888-2 standard test.

**82.7 km/h\***  
Moose Test

**5.5m**  
Minimum  
turning radius

**50:50**  
Balanced weight  
distribution
